DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: (i) p. 28, line 6 "Tables 15 5o 23" the examiner has assumed for examination purposes that "5o" is a typographical error and should be "to"; clarification and correction is required. (ii) Applicant's preliminary amendment (7/17/03) states that old tables should be removed (they do not appear to be present in the file) and that new tables 1 to 23 should be entered between pages 38 and 39 (there is no page 39 present in the application). Does the applicant mean between pages 28 and 29 or after page 38? Appropriate correction is required.

Allowable Subject Matter

Claims 1-4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claims as supported by the specification differs from the prior art in that it does not teach a flux cored wire for arc welding which specifically has a nitrogen content in the flux of 0.005 to 0.035 mass %.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
